

Centrifugal Filter

Advanced Features:

- Advanced molecule demulsification filter element instead of traditional additive and glass fiber demulsification.
- Coalescence separation technology at ordinary pressure.
- Special vacuum negative pressure dehydration system.
- Purification: nets filtering combined with macromolecule adsorption.
- It takes about 3-5 minutes one-time, high speed.

List of Centrifugal Filters

Model	Specifications	Pictures
GT-CF30 Centrifugal Filter	Power: 1.6kw Volume: 30L Operating Pressure: 40Pa Weight: 45kg	
GT-CF40 Centrifugal Filter	Power: 1.8kw Volume: 40L Operating Pressure: 40Pa Weight: 60kg	
GT-CF60 Centrifugal Filter	Power: 2.0kw Volume: 60L Operating Pressure: 40Pa Weight: 75kg	
GT-CF80 Centrifugal Filter	Power: 2.2kw Volume: 80L Operating Pressure: 40Pa Weight: 90kg
