

# Vacuum Filter Machine

## **Main Features:**

- Vacuum oil filter machine, can rapidly separate kinds of contaminations such as metal impurities, carbon residues, colloids, suspended and emulsified matters from newly produced oil, always a good partner of oil press machine.
- It can also be used as a tool to restore the physiochemical index (i.e. viscosity, PH value) of fried cooking oil to be effectively the same as brand new oil.
- Suitable for all kinds of edible oil purification, e.g. soybean oil, peanut oil, flax seed oil, sunflower oil, palm oil, rapeseed oil, coconut oil, walnut oil, etc.

## **Working Process:**

- First the oil flow onto the filter pad, the vacuum suction pump works to pump the oil into the tank through the filter pad, which will filter out kinds of impurities and makes the output oil clean and refined.

## **Machine Specifications**

Model:	Vacuum Oil Filter GT-VF10
Capacity:	10 kg/hr
Motor Power:	0.25kw
Heating Power:	0.5kw
Dimension:	490*570*600mm
Net Weight:	40kg
Color:	Silver
Material:	Stainless Steel
